Professional Summary

Backend Developer with hands-on experience in Java, Spring Boot, Spring MVC, Node.js, Express.js, REST APIs, MySQL, and MongoDB. Experienced in CRUD operations, authentication, role-based access control, MVC architecture, and database integration through internship and full-stack projects.

Education

V.M. Institute of Engineering and Technology, Nagpur

2021 – 2024

Bachelor of Technology (B.Tech) in Information Technology

CGPA: 6.65

Government Polytechnic, Bramhapuri

2018 – 2021

Diploma in Information Technology

Percentage: 80.75%

Technical Skills

Programming Languages: Java, JavaScript

Backend Technologies: Spring Boot, Spring MVC, Node.js, Express.js, REST APIs, AWS

Frontend Technologies: React.js, HTML5, CSS3, EJS

Databases: MySQL, MongoDB

Architecture Concepts: MVC, CRUD Operations, Authentication, Authorization, OOP, DSA, DBMS, Exception Handling, Multithreading

Developer Tools: Git, GitHub, Postman, VS Code, IntelliJ IDEA, Eclipse, STS

Experience

Sathya Technologies, Hyderabad

Jul 2024 – Feb 2025

Full Stack Developer Intern

Hyderabad, India

- Developed full-stack web applications using Java, Spring Boot, and React.js.
- Designed and implemented RESTful APIs for seamless communication between frontend and backend systems.
- Performed CRUD operations using MySQL and optimized database interactions.
- Built responsive and user-friendly interfaces using HTML, CSS, and JavaScript.
- Integrated frontend and backend modules using Spring MVC architecture.
- Collaborated with developers using Git and GitHub for version control and project management.

Projects

Spotify – Music Streaming Web Application | Node.js, Express.js, MongoDB, EJS, MVC

Demo — GitHub

- Full-stack music streaming application with user authentication, session management, and Admin/User role-based access.
- Song management with audio/image upload, search, category filtering, artists, albums, trending/popular songs, and play count tracking.
- Music upload and management features including song title, artist, album, category, cover image, audio file, trending status, and play count.
- Admin dashboard with song CRUD operations, user/playlist statistics, and responsive Spotify-inspired UI.

VenusMart – E-Commerce Web Application | Node.js, Express.js, MongoDB, EJS, MVC

Demo — GitHub

- Full-stack e-commerce application with user authentication, session management (MongoDB-backed sessions), and Admin/User role-based access control.
- Implemented product catalog with search, category filters, image uploads (Cloudinary), and customer reviews.
- Added cart, wishlist, address management, and coupon system, with Razorpay payment integration for checkout.
- Built an admin dashboard for product, order, and coupon CRUD operations with order tracking.

WanderLust - Full Stack Vacation Rental Platform | Node.js, Express.js, MongoDB, EJS, MVC

Demo — GitHub

- Developed a full-stack vacation rental platform inspired by Airbnb, enabling users to explore and manage property listings.
- Built RESTful APIs using Node.js and Express.js for handling listings, bookings, and user operations.
- Implemented secure user authentication and authorization using session-based login system.
- Designed dynamic and responsive user interfaces using EJS, HTML, and CSS.
- Integrated MongoDB for efficient storage and retrieval of users and listings.
- Applied MVC architecture to maintain a scalable and well-structured codebase.

Weather App | React.js, JavaScript, Material UI, OpenWeatherMap API

GitHub

- Developed a weather application that fetches real-time weather data using OpenWeatherMap API.
- Implemented city-based search functionality to display weather information instantly.
- Displayed temperature, humidity, and weather conditions dynamically.
- Created an interactive UI with weather-based icons and responsive design.

Achievements & Activities

Sports & Problem Solving

- Secured 2nd Place in the All India Hockey Tournament and represented teams at State and National level competitions.
- Active LeetCode practitioner, consistently solving Data Structures and Algorithms problems using Java to strengthen problem-solving skills.
- Strong understanding of Object-Oriented Programming, DBMS, Computer Networks through academic and practical projects.
