Professional Summary

Full Stack Developer experienced in building scalable full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Completed a 7-month internship at Sathya Technologies, Hyderabad, delivering RESTful APIs, authentication, CRUD-based systems, and database integration, alongside 4 independently built full-stack projects. Strong foundation in DSA with regular problem-solving practice on LeetCode.

Education

V.M. Institute of Engineering and Technology, Nagpur

2021 – 2024

Bachelor of Technology (B.Tech) in Information Technology

CGPA: 6.76/10

Government Polytechnic, Bramhapuri

2018 – 2021

Diploma in Information Technology

Percentage: 80.75%

Technical Skills

Programming Languages: Java, JavaScript

Frontend Technologies: React.js, HTML5, CSS3, Bootstrap, Material UI

Backend Technologies: Node.js, Express.js, EJS, REST APIs

Databases: MySQL, MongoDB

Integrations & APIs: Cloudinary, Razorpay, OpenWeatherMap API

Developer Tools: Git, GitHub, Postman, VS Code, IntelliJ IDEA, Eclipse, STS

Core Concepts: Data Structures & Algorithms, Authentication, Authorization, CRUD Operations, OOPs, DBMS

Experience

Sathya Technologies, Hyderabad

Jul 2024 – Feb 2025

Full Stack Developer Intern

Hyderabad, India

- Developed full-stack web applications using Node.js, Express.js, and React.js as part of a 7-month internship.
- Designed and implemented 10+ RESTful API endpoints for seamless communication between frontend and backend systems.
- Performed CRUD operations using MongoDB and optimized database queries, reducing average response time by 5%.
- Built responsive, user-friendly interfaces using HTML, CSS, and JavaScript across 6+ application screens.
- Integrated frontend and backend modules using MVC architecture, streamlining feature delivery across 3 modules.
- Collaborated with a team of 4 developers using Git and GitHub for version control and project management.

Projects

Spotify – Music Streaming Web Application | Node.js, Express.js, MongoDB, EJS, MVC

Demo — GitHub

- Built a full-stack music streaming application supporting 10+ songs with user authentication, session management, and Admin/User role-based access control.
- Implemented song upload and management (title, artist, album, category, cover image, audio file) with MongoDB schemas across songs, users, and playlists.
- Enabled song discovery through search, category filtering, and trending/popular sections, improving content discoverability with play count tracking.
- Developed an admin dashboard for song CRUD operations and user/playlist analytics, paired with a responsive Spotify-inspired UI.

VenusMart – E-Commerce Web Application | Node.js, Express.js, MongoDB, EJS, MVC

Demo — GitHub

- Built a full-stack e-commerce application with user authentication, session management (MongoDB-backed sessions), and Admin/User role-based access control.
- Implemented product catalog with search, category filters, image uploads via Cloudinary, and customer reviews across 10+ product listings.
- Added cart, wishlist, address management, and a coupon system, integrating Razorpay for secure checkout payments.
- Built an admin dashboard for product, order, and coupon CRUD operations, including real-time order status tracking for 2+ orders.

WanderLust – Full Stack Vacation Rental Platform | Node.js, Express.js, MongoDB, EJS, MVC

Demo — GitHub

- Developed a full-stack vacation rental platform inspired by Airbnb, enabling users to explore and manage 7+ property listings.
- Built RESTful APIs using Node.js and Express.js for handling listings, bookings, and user operations.
- Implemented secure user authentication and authorization using a session-based login system.
- Designed dynamic and responsive user interfaces using EJS, HTML, and CSS.
- Integrated MongoDB for efficient storage and retrieval of users and listings, applying MVC architecture for a scalable codebase.

Weather App | React.js, JavaScript, Material UI, OpenWeatherMap API

GitHub

- Developed a weather application fetching real-time data via the OpenWeatherMap API for 25+ cities worldwide.
- Implemented city-based search functionality to display weather information instantly.
- Displayed temperature, humidity, and weather conditions dynamically with a responsive, icon-based UI.

Achievements & Activities

Problem Solving

- Solved 105+ Data Structures and Algorithms problems on LeetCode after completing DSA training from PW Skills.
- Active LeetCode practitioner, consistently solving problems in Java to strengthen problem-solving skills.
- Strong understanding of Object-Oriented Programming, DBMS, and Computer Networks through academic and practical projects.
